Professional Summary

Dedicated Software Engineer with **over 4.11 years of experience** specializing in backend development and scalable API integration using the **.NET ecosystem**. Proven track record of delivering mission-critical applications for high-security clients, including **Navy Headquarters, Naval Dockyard, and APCRDA**.

Expertise spans the full software development lifecycle, from navigating **legacy ASP.NET 3.5/4.0 systems** to architecting modern solutions with **ASP.NET Core, SignalR, and Entity Framework**. Highly proficient in **SQL Server and Oracle** database management, with a strong focus on query optimization and real-time data synchronization. Currently expanding technical breadth into **React.js, Azure Service Bus, and GitLab CI/CD** to build highly available, cloud-ready enterprise solutions

Availability: - **Immediate Joiner**

EDUCATION

B.SC in Electronics and Computers – Krishna University (Machilipatnam).

Key Skills & Expertise

- Strong command of HTML5, CSS3, and JavaScript for building responsive, user-friendly interfaces.
- Experienced in REST APIs integration — consuming external services and pushing structured data into SQL databases.
- Skilled in Entity Framework and LINQ, ensuring seamless data access and architected query performance.
- Proficient in ASP.NET Core and ASP.NET 4.8, capable of handling both modern and legacy API projects.
- Hands-on with end-to-end project execution — from requirement gathering and UI/UX improvements to backend logic and deployment.
- Known for proactive bug resolution, clear documentation, and reliable version compatibility management across .NET environments.

SKILLS

Category	Skills / Tools
❖ Programming Languages	C#, JavaScript, SQL (T-SQL, PL/SQL)
❖ Web Frameworks & Tech	ASP.NET Core, ASP.NET 4.8/3.5, SignalR, Entity Framework, LINQ
❖ Front-End Development	HTML5, CSS3, Bootstrap, jQuery, Ajax, Razor Pages
❖ Databases	Microsoft SQL Server (MSSQL), Oracle SQL (Stored Procedures, Views, Joins, Indexing)
❖ API Development	RESTful APIs, Webhook (Reverse APIs), SOAP Web Services
❖ IDE	Visual Studio (2008, 2015, 2022)
❖ Version Control & CI/CD	Git (branching, merging, conflict resolution), GitLab (YAML scripting for CI/CD pipelines)
❖ Deployment & Hosting	IIS (Internet Information Services)
❖ Developer Tools	Postman, Swagger.

EXPERIENCES

<u>Apr 2025 to Present</u> Technologies and Components in this Project: - C#, Asp.Net Core, LINQ, Entity Framework, MS SQL, JavaScript, CSS, HTML	<u>ENTRO LABS IT SOLUTIONS PVT LTD - VIJAYAWADA</u> <u>Client: - APCRDA (Andhra Pradesh Capital Region Development Authority)</u> <u>Project Overview:</u> - Maintain and enhance mission-critical applications for urban planning and land management under APCRDA, built using both ASP.NET Framework 4.0 and ASP.NET Core 3.0 . These systems support administrative workflows, property records, citizen services, and infrastructure projects. <u>Daily Responsibilities</u> • <u>Page Maintenance</u> <u>Modify existing pages based on client requests—adjust UI, add validations, update business logic.</u> • <u>New Page Development</u> <u>Build new pages using C#, JavaScript, HTML/CSS, and SQL aligned with APCRDA’s evolving requirements.</u> • <u>Bug Fixing & Issue Resolution</u> <u>Reduced system downtime by 15% through proactive debugging and SQL performance tuning for APCRDA property records. Siyanda Info Tech Mostly my job is to maintain applications</u> • <u>Client Interaction</u> <u>Attend meetings with APCRDA stakeholders for requirement gathering, discussing change requests, and presenting solutions.</u> • <u>Version Compatibility</u> <u>Navigate legacy systems in ASP.NET 4.0 while integrating features using ASP.NET Core 3.0 in modular components.</u>
<u>Aug 2024 to Apr 2025</u> Technologies and Components in this Project: - C#, SignalR, Asp.Net Core, LINQ, Entity Framework, MS SQL, JavaScript, CSS, HTML	<u>ACS TECHNOLOGIES LIMITED – KOCHI</u> <u>Client: - Navy Headquarters</u> <u>Project Overview:</u> - Involved on the MMS (Mail Management System) , focusing on enabling seamless unit-to-unit file sharing and managing task dependencies across units, as well as within individual teams. On the services side, I am overseeing the live MMS project and managing the NOC Passport project . Both are under my responsibility. • C#: Utilized as the primary programming language for application development. • SignalR: Implemented real-time communication features in ASP.NET applications, including instant mail notifications and live toaster alerts integrated across master pages using JavaScript, ensuring seamless user experience and immediate data updates. • ASP.NET Core: A robust framework for building scalable and high-performance web applications. • LINQ and Entity Framework: Employed for efficient querying and interaction with the database. • MS SQL: Serves as the backend database for data storage and management. • JavaScript, Razor pages CSS, and HTML: Frontend technologies used to create a responsive and user-friendly interface.

Apr 2023 to Apr 2024

Technologies and

Components in this

Project: - C#,

ASP.NET,

JavaScript, SQL

Oracle

Siyanda Info Tech – Vizag

Client: - Naval Dockyard

Project Overview: - Managed multiple client projects simultaneously, adapting to evolving requirements and daily changes. Ensured applications were aligned with client guidelines and delivered with quality, efficiency, and responsiveness.

- Module which is Developed on Visual Studio 2015 asp.net 3.5 & 4.8 Frame Work C# Language.
- Collaborated with team members to develop large-scale projects.
- Refactored existing code to meet industry standards and guidelines.
- Tested outputs to ensure functionality and quality.
- Designed visually appealing, user-friendly, and engaging interfaces.
- Deployed developments and monitored user engagement.
- Incorporated client feedback into future versions for continuous improvement.

Jun 2022 to Jan 2023

Technologies and

Components in this

Project: - C#,

ASP.Net, J Query,

Ajax, JavaScript,

SQL Server

GVR Info Systems - Hyderabad

Client: - Employees' State Insurance Corporation (ESIC)

Project Overview: - As my client is Employees' State Insurance Scheme of India is a multi-dimensional Social Security Scheme. In that Project I handle Recovery.

- Module which is Developed on Visual Studio 2008 asp.net 3.5 Frame Work C# language.
- **Maintained and architected** high-traffic social security applications, ensuring 99% uptime for ESIC recovery modules.
- Test, monitored, make better solution through incremental updates/new features/app optimization
- Involved In Debugging and fixing the bugs.

Jul 2021 to May 2022

Components in this

Project: - C#,

ASP.Net, J Query,

Ajax, JavaScript,

SQL Server

Infinity Idea Technologies || Vizag || Client: - Aditya Degree College and ISTS

(International School of Technology and sciences for Women)

Project Overview Aditya Degree College & ISTS: - I gained hands-on experience in various aspects of software development and maintenance.

- Module which is Developed on Visual Studio 2008 asp.net 3.5 Frame Work C# language.
- Began career as an IT fresher.
- Conducted unit testing on various applications to ensure quality and functionality.
- Analysed and reviewed the flow of existing web applications.
- Progressively resolved small bugs and performed maintenance tasks on web pages.

Transitioned into a developer role, contributing to new development and enhancements.

(Satya ram Pavan Kumar)
